RECESSIONAL

MONICA BERTAGNOLLI, MD
DIRECTOR, NATIONAL INSTITUTES OF HEALTH

Monica Bertagnolli, MD, is the 17th director of the National Institutes of Health (NIH). She was nominated by President Joe Biden on May 15, 2023, and confirmed by the U.S. Senate on November 7, 2023; she took office on November 9, 2023. She is the first surgeon and second woman to hold the position. As the NIH director, Dr. Bertagnolli oversees the work of the largest funder of biomedical and behavioral research in the world. She previously served as the 16th director of the National Cancer Institute (NCI), the Richard E. Wilson Professor of Surgery in surgical oncology at Harvard Medical School, a surgeon at Brigham and Women's Hospital, and a member of the Gastrointestinal Cancer Treatment and Sarcoma Centers at Dana-Farber Cancer Institute.

Throughout her career, Dr. Bertagnolli has been at the forefront of the field of clinical oncology. Her laboratory focused on advancing our understanding of the genetic drivers of gastrointestinal cancer development and the role of inflammation as a promoter of cancer growth. As a physician–scientist, she led translational science initiatives from 1994 to 2011 within the NCI-funded Cooperative Groups Program (now known as NCI's National Clinical Trials Network); and from 2011 to 2022, served as group chair of the Alliance for Clinical Trials in Oncology, a National Clinical Trials Network member organization. In addition, from 2007 to 2018, she served as the chief of the division of surgical oncology for the Dana-Farber Brigham Cancer Center.

Dr. Bertagnolli has championed collaborative initiatives to transform the data infrastructure for clinical research and is the founding chair of the minimal Common Oncology Data Elements (mCODE) executive committee. She also is a past president and chair of the board of directors of the American Society of Clinical Oncology and has served on the board of directors of the American Cancer Society and the Prevent Cancer Foundation. In 2021, she was elected to the National Academy of Medicine, having previously served on the National Academies National Cancer Policy Forum.

The daughter of first-generation Italian and French Basque immigrants, Dr. Bertagnolli grew up on a ranch in southwestern Wyoming. She graduated from Princeton University with a bachelor of science in engineering degree and attended medical school at the University of Utah. She trained in surgery at Brigham and Women's Hospital and was a research fellow in tumor immunology at the Dana-Farber Cancer Institute.

THE OATH FOR PUBLIC HEALTH PROFESSIONALS¹

Health is a human right. The public health community exists to safeguard that right. It is a defining element of a civil society. Public health represents the collective actions necessary to protect the health of all people. Through prevention science and practice we can accomplish this goal. As a public health professional, guided by these principles, I declare the following:

I will work to ensure that all people have the chance to live full and productive lives, free from avoidable disease, injury, and disability, and are supported in their pursuit of physical, mental, and social well-being.

I will hold myself to the highest ethics, standards, values, and responsibilities as I move forward the science and practice of public health.

I will respect the rights, values, beliefs, and cultures of those individuals and communities with whom I work.

I will rely on evidence to support my decisions and actions, and translate that evidence into policies and programs that improve health for all.

I will add to the body of research and knowledge and share my discoveries freely.

I will continuously seek new information and be open to ideas that can better protect and promote the health of populations.

I will advance health literacy for all and seek equity and justice for marginalized populations.

With this oath, I commit to the ideals and mission of public health.

¹Rothman S, Lapp I, Corman R, Fried LP. May 2009. This oath was developed by the faculty and students of the Columbia University Mailman School of Public Health to articulate the professional commitment of the School's students, graduates, and faculty.
