

## **Mailman School Data Security Advisory: New Login Message, 2-16-2012**

As part of the ongoing effort at the Medical Center to raise data security awareness, CUMC IT has added a message for all users who login to the MC domain. (Note: Most Mailman School Faculty & Staff are on this domain and will see this message.) The message is simply a reminder that much of the data we access on a daily basis is classified as "sensitive" and we have an obligation to act responsibly with it.

The text of the message is as follows:

*"The information in Clinical Information Systems at Columbia University Medical Center is confidential, and use is on the need-to-know basis. All access is logged. Unauthorized or improper use of the system or the information in it may result in dismissal and civil or criminal penalties."*
