**Degree or Credit Requirements**

Flat-rate tuition covers a maximum of 45 credits to fulfill a minimum of 42 required credits for the degree. The Accelerated MPH is designed to keep students on pace toward graduation, while taking no more than 21 credits per semester (fall and spring) and 6 credits max in the summer. It is each student's responsibility to manage her/his course load to remain within the 21 credits/semester and 45 credit/cumulative maximums. Students will be charged a per-point rate if they go above these maximums; OSA must approve more than 21 credits per semester. It is vital that each student look ahead at her/his specific academic plan to avoid a situation where one must take required courses that would put one's semester/cumulative credit total above 21/60. No academic plan will force a student into this situation, so any additional costs related to overages are the responsibility of the student. Students must pay tuition and fees for the summer term even if no actual classes are taken in the term.
