staff. Knowledge of medical devices, health information technology, cloud, big data, analytics, SaaS, genomics, CRM, RPA, and AI/cognitive.

Mailman helped me expedite my professional trajectory in a field where there are not many women of color, I am excited to pay that forward. As a NYC native, raised in Elmhurst Queens, by immigrant parents I know how education can open doors for many professional opportunities. With the upcoming of Mailman's Centennial Celebration in 2022, I would love to be a part of/help with the planning/organization for the school's next 100 years.
